

CCS Media Recruitment: Software Developer

Remote

Overview

The Software Developer will work as part of a team developing and improving bespoke in-house software solutions such as a CRM, automation programs and partner integrations. The role also involves providing technical application support to the IT Help Desk. In collaboration with the development team, you will deliver scalable software engineering solutions using the latest technologies.

Salary – up to £40k depending on experience

Responsibilities:

You will be required to work on a range of projects varying in size and complexity, including:

- .NET application development, including web, services, and bots
- Leading and supporting others within the development team
- Preparing functional and technical specification documents
- Estimating realistic timescales for deliveries and communicating periodic updates

Desired Skills and Experience:

- Experience integrating into Infor System21 ERP
- Experience of POS, retail, or e-commerce systems.
- Experience of Windows Server, investigation of computer events and IIS
- Experience of Continuous Integration / Continuous Deployment
- Experience of delivering training and documentation to support the deployment of a software product.

Essential Skills and Experience:

- Commercial ASP.NET web application development using C#, MVC, Bootstrap, jQuery, APIs, and SQL Server with a specific focus on CRM platforms and process improvement.
- Demonstratable experience of TSQL
- Experience working on internal development projects and demonstrate the ability to communicate effectively with stakeholders
- Experience of using version control systems such as Bitbucket
- Experience of using work management tools such as Jira.
- Experience of developing and consuming APIs (Rest / SOAP)
- Strong analytical and problem-solving skills
- Excellent communication and teamwork abilities.
