

Galaxy Book4

Optimise every aspect of your working day with professional devices that work for every budget. The Galaxy Book4 is the heart of an exciting new range, designed for businesses of all sizes. It features all the amazing features and impressive specifications of the range, at a smaller price. It's ideal for outfitting entire teams, getting them into action at a moment's notice.

Copilot on call

Let your AI assistant take the wheel, so you can focus on what's really important.

Now you can do everything you've dreamed of in your workday, without breaking a sweat. Microsoft's AI assistant, Copilot, is ready to help you get it done.

With one tap, you can call up Copilot to complete a wide variety of tasks across the Microsoft 365 suite whether that's writing a formal email, identifying patterns in big spreadsheets of data, or drafting a presentation in a matter of minutes.

Multi-task like a pro

Get all the power you need to take the stress out of your day to day tasks and calls.

Multi-task like never before, even when you're on a video call. The Galaxy Book4 is the ideal do it all laptop for everyday users. With the latest Intel® Core™ processors, the laptop ensures your workday is fuss free.

Stay supercharged, anywhere

Smart battery consumption ensures you're never left without charge for your travels.

When you're hopping between the commute, the office and long meetings, you need a battery you can rely on. You'll always have enough charge to get it done.

Professional looks, professional power

Plenty of portable processing power and smarts within elegant, slim hardware.

The Intel® Core™ 7/5 processor inside drives next generation apps with ease. So, whether you're presenting to your hybrid working team or managing your inventory, you can be confident that your laptop can handle it.
